

ScripScrapping

Description:

Be prepared to be dazzled. Join the club and get hooked. Scrapbooking is the latest and trendiest craze to hit the UK. Do you have tons of photos stuffed away in a box or a drawer or on your computer. Its time to get them out of their hiding places and onto a layout that will always be remembered. Instead of just slitting the photos in an unimaginative album give each page emotion so that everyone can know what that person is like through colours, patterns, embellishments and journaling. You could even use something personal of theirs to complete the project.
